

Timber Frame Constr.

When a home owner decides to build a timber frame home, it is very important that the home owner choose the right timber framing company to build that home. SCI specializes in the construction of timber frame structures with

structural insulated panels (SIPs). SCI is superbly qualified in all the technical and engineering aspects of both small and complex designs, particular timber framing construction, and our commitment to excellence and detail shows in every home we build.

Services Include:

- Site work (onsite septic systems)
- Residential Earthwork (Excavating)
- Poured Concrete Foundations
- Timber Frame Construction
- Structural Insulated Panels (SIPs)
- Conventional Construction
- Stone / Masonry Work
- Underground Utility Installation

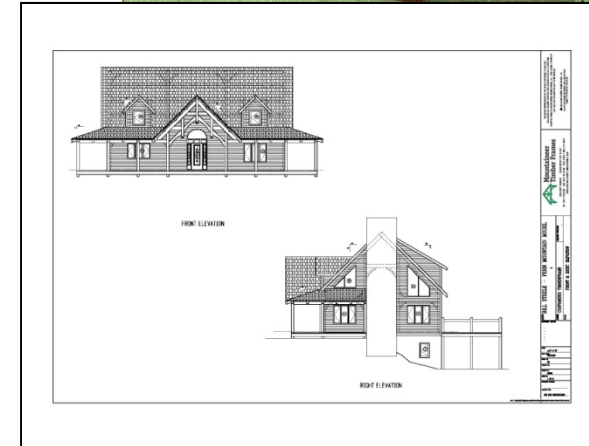

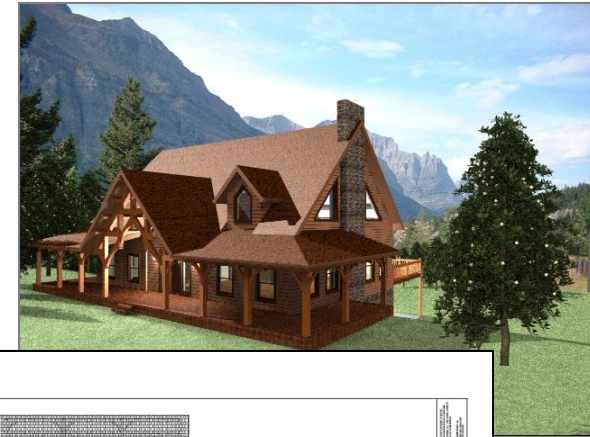

Interior Finishes

- Timber Frame Basements
- Luxury Kitchens
- Stone Fireplaces
- Custom Bathrooms

Design Services

- Permitting and Specifications
- Construction & Shop Drawings
- Preliminary & Final Design Services
- Architectural Services
- Engineering
